Course No. : CS G520/SS G520
Course Title : Advanced Data Mining

Birla Institute of Technology & Science, Pilani
Hyderabad Campus

SECOND SEMESTER 2019-2020
MODIFIED Course Handout Part II

Date: Jan-2020

In addition to part-I (General Handout for all courses appended to the time table) this portion gives further specific details regarding the course.

Course No. : CS G520/SS G520
Course Title : ***Advanced Data Mining***
Instructor-in-Charge : ***Jabez Christopher***

Course Description & Scope:

Advanced Data Mining is a specialization course of Data Mining. Topics covered go beyond conventional record data mining to mining complex data structures and complex data: Tree/graph, biological data, web/text data, stream data, spatiotemporal data, time series data, high-dimensional data. A substantial portion of the course will focus on research projects, where students will study and work on a well-defined research problem. The course also deals with applications such as mining social networking sites, bioinformatics and medical informatics.

Objectives of the Course:

- To expose key research areas in data mining.
- Emphasize on the design and implementation of efficient and optimized algorithms for data mining.
- Emphasize the use of WEKA, MATLAB and R to implement Data preprocessing and Data Mining tasks.
- To improve research and presentation quality thereby enable students to comprehend and critically analyze data mining research.

Course Plan:

Lecture No.	Learning objectives	Topics to be covered	Reference
1	To understand the objectives of the course	Introduction to the course & Lab Topics	---
2,3	Refresh the basics of KDD and Data Mining tasks.	Overview of Knowledge Discovery • Data Integration • Data Preprocessing • Data Mining	R2 Ch 1, 2, 3; TB Ch 1 [RM 01]
4-8		Overview of Data Mining • Association Analysis • Classification • Clustering	R2 Ch 6, 8, 10; [RM 02]
9,10		Statistics for Data Mining	Class Notes
	WEB DATA MINING		
11-15	Concentrate on use of Data Mining techniques to Web and Social Networks, and understand their their use in Web analytics, user profiling and personalization.	Social Network Analysis: Preliminaries and Properties • Homophily • Triadic Closure • Dynamics of Network Formation • Power-Law Degree Distributions • Measures of Centrality and Prestige Community Discovery • Kernighan–Lin Algorithm • Girvan–Newman Algorithm • Multilevel Graph Partitioning: METIS • Spectral Clustering	TB Ch. 19
	BIOLOGICAL DATA MINING		
16-20	Enable students to find patterns and statistical dependencies in large biological databases and to gain an understanding of the underlying system from which the data were obtained. Use computational biology & data mining tasks to analyze vast	**Data Transformations** • Normalization Techniques for Gene Expression Analysis. • Data Preprocessing of Mass Spectrometry Data • Data Preprocessing for Genomic Sequence Data • Ontologies in Bioinformatics **Applications of Classification & Clustering in Bioinformatics**. • Distance Metric in Gene Expressions for Coexpressed Genes	**R5 Ch. 5** **R5 Ch. 6**

Course No. : CS G520/SS G520
Course Title : Advanced Data Mining

	experimental data generated by high-throughput technologies, and thereby enables the generation of new hypotheses.	• Gene Expression Clustering Using Mutual Information Distance Measure • Gene Expression Data Clustering Using a Local Shape-Based Clustering • Fuzzy k-Means Clustering on Gene Expression **Temporal Data Mining in Medicine and Bioinformatics**	
	SPATIAL & TEMPORAL DATA MINING		
21-25	To study how to investigate temporal data and understand models and methods for representation.	**Mining with Contextual Spatial Attributes. Trajectory Mining** **Temporal Data Similarity Computation, Representation, and Summarization** • Temporal Data Types and Preprocessing • Temporal Data Preprocessing • Time Series Similarity Measures • Time Series Summarization Methods • Temporal Event Representation • Temporal Knowledge Representation in Case-Based Reasoning Systems	TB Ch.16 R4 Ch. 2
26-28		**Forecasting Model and Error Measures** **Event Prediction** **Time Series Forecasting** • Moving Averages • Exponential Smoothing • Time Series Forecasting via Regression • Forecasting Seasonal Data via Regression • Random Walk • Autocorrelation • Autoregression • ARIMA Models	R4 Ch. 4 TB Ch. 14
	RECENT TRENDS		
29-36	Understand the use of Optimization techniques to catalyze the performance of Algorithms and parameter-tuning.	**Optimization Algorithms for Data Mining** Lagrangian Methods Gradient Descent Algorithm Simulated Annealing Evolutionary Algorithms (GA) Swarm Intelligence Algorithms • Particle Swarm Optimization	Research articles (to be decided)
37-40	Understand how to handle uncertainty in decision-making systems by incorporating fuzzy logic and FIS	**Soft Computing Approaches for Data Mining** Handling Uncertainty in Data Resolving Uncertainty using Fuzzy Logic Fuzzy Inference Systems Evolving Fuzzy Systems	R7 Ch 1, 4, Class notes & Research articles (to be decided)
41, 42	---	**RESEARCH GAPS & FUTURE DIRECTIONS**	---

Course No. : CS G520/SS G520
Course Title : Advanced Data Mining

EXISTING EVALUATION SCHEME:

Component	Duration	Weightage (%)	Date & Time	Nature of Component
Mid-Semester Test	1½ hours	20	Completed	Closed
Quizzes (2)	½ hour	5	Quiz 1 - Completed	Closed
Labs Assignments & Projects*	--	30	Completed	Open
Term Paper & Seminar	--	10	Completed	Open
Comprehensive Exam	3 Hours	35		Closed

*Lab-projects will emphasize on the use of WEKA/MATLAB/R to implement preprocessing and data mining algorithms on datasets from open repositories. In addition to this the students are expected to survey, review & compare research works in similar areas and prepare articles and reports. Evaluation would be a continuous assessment model during the practical sessions.

Chamber Consultation Hours: To be announced in the class.

Make-up Policy:

Notices: All the notices concerning this course will be displayed on the CMS.

MODIFIED EVALUATION SCHEME

Component	Duration	Weightage (%)	Date & Time	Nature of Component
Mid-Semester Test	1½ hours	20	--	Closed
Quizzes (1)	½ hour	5	--	Closed
Labs Assignments & Projects*	--	30	--	Open
Term Paper & Seminar	--	10	--	Open
Comprehensive Exam	3 Hours	35	To be Announced	Closed

Pre compre marks will be posted shortly with reference to the modified Handout.
