BIRLA INSTITUTE OF TECHNOLOGY AND SCIENCE, PILANI – HYDERABAD CAMPUS

SECOND SEMESTER 2020-2021

Course Handout (Part II)

Date16-01-2021

In addition to partI (General Handout for all courses appended to the time table), this portion gives further specific details regarding the course.

Course No. : **ME F220**
Course Title : **Heat Transfer**
Instructorincharge : **SATISH K DUBEY**
Team of Instructors :Supradeepan K, R Parameshwaran, Mrinal K Jagirdar, J Murali Mohan, Sunkara Prudhvi, Shaik Gouse A

1. Course Description:

Fundamental concepts of heat transfer; steady-state and unsteady-state heat conduction; analytical and empirical relations for forced and free convection heat transfer; heat exchanger analysis and design; Heat transfer by radiation; condensation and boiling,: associated laboratory.

2. Scope and Objective:

.This course is designed to make the students familiar with the concepts of heat and their applications in engineering. As a part of this course, students have to do the experiments through which they can correlate with their theoretical knowledge on the subject.

3. Text Books:

T1 : J.P. Holman, Heat Transfer, McGraw Hill, 2002, 9th Edition.
T2 : Srinivas, M & R.K. Mittal Transport Phenomenta-II Notes-EDD, 2003.(Data book)

4. Reference Books:

R1 : F. P. Incropera & D. P. Dewitt, Fundamentals of Heat and Mass Transfer, John Wiley & Sons, 2001, 5th edition.
R2 : F. Kreith & M. S. Bohn, Principles of Heat Transfer, Brooks Cole, 2000, 6th edition.

5. Course Plan:

Lecture No.	Learning Objectives	Topics to be covered	Chapter in the Text Book
1	To revise the basic concepts of transport phenomena	Introduction to heat and mass transfer	Lecture notes & 1.1 -1.4(T1)
2 – 3	To learn the basics of conduction heat transfer	Heat conduction equation	1.1 – 1.2 (T1)
4 – 5	To understand the analysis of one-dimensional steady state heat conduction	1D steady state heat conduction	2.1 – 2.8 (T1)
6 – 8	To understand the heat transfer from extended surfaces	Finned Surfaces	2.9 – 2.10 (T1)
9 – 14	To do the analysis of multidimensional steady state heat conduction	Analytical and numerical methods	3.1 – 3.2 (T1) 3.4 – 3.6 (T1) Lecture notes
15 – 17	To learn heat transfer analysis of unsteady-state conduction	Lumped system analysis; analytical methods of analysis, numerical	4.1 – 4.6(T1)
18-19	To learn the principles of convection heat transfer	Concepts and basic relations in convection heat transfer	5.1-5.2 (T1)
19-21	To understand the forced convection heat transfer for flow inside ducts	Analytical solutions and empirical relations	5.10, 5.11, 6.2 (T1)
22-25	To understand the forced convection heat transfer for flow over bodies	Analytical solution and empirical relations for forced convection heat transfer for flow over flat plate, cylinders, spheres and tube banks	5.4 – 5.9, 5.12, 6.3 – 6.5 (T1) Lecture notes
26-27	To understand the heat transfer	Analytical solutions and empirical	7.2 – 7.12 (T1)

	analysis of natural convection systems	correlation	Lecture notes
28	To understand the basic laws of radiation	Basic laws and nature of thermal radiation	8.1-8.3 (T1)
29 – 34	To learn the principles of radiation heat transfer	Radiation heat exchange between surfaces; radiation shields	8.4 – 8.8; 8.16 – 8.17 (T1)
35– 37	To learn the design and analysis of heat exchangers	Types of heat exchangers; LMTD and NTU method of analysis	10.1 – 10.6 (T1)
38 – 40	To learn the principles condensation and boiling	Filmwise, dropwise condensation ,pool boiling, flow boiling basics	9.1-9.2,9.4-9.5 (T1) Lecture notes
41-42	Introduction to mass transfer	Analogy between heat and mass transfer, mass diffusion, Fick's law of diffusion, transient mass diffusion, mass convection, limitations of heat and mass transfer analogy.	11.1-11.5 (T1) Lecture notes

6. List of Experiments:

The list of experiments and complete modalities of operation of the laboratory such as the exact titles of experiments, reports submission and evaluation methodology etc. shall be announced at the beginning of laboratory session by the lab instructors.

List of Experiments

S. No.	Name of Equipment
1	Thermal Conductivity of Insulating Powder
2	Thermal Conductivity of Insulating Slab
3	Heat Transfer from Pin Fins
4	Thermal Conductivity of liquid
5	Heat Transfer in Force Convection
6	Heat Transfer in Natural Convection
7	Emissivity Measurement Apparatus
8	Stefen's Boltzman Apparatus
9	Double Pipe Heat Exchanger
10	Pool Boiling Apparatus
11	Vertical and Horizontal Condenser
12	Convection Drying Equipment

7. Evaluation Schedule:

Evaluation Compo-nent	Duration (minute)	Weightage (%)	Marks	Date & Time	Nature of Component
Mid Semester Test	90	30	90	02/03 1.30 - 3.00PM	**OB**
Tutorial Test(s)	-	10	30	Evenly spaced throughout the semester during tutorial hour	**OB**
Lab work *	-	20	60	Evenly spaced throughout the semester during Practical	**OB**
Comprehensive Exam	120	40	120	05/05 FN	**OB**

***Lab work**

Evaluation Compo-nent	Duration (minute)	Weightage (%)	Date & Time	Nature of Component
Lab Reports	-	10%	Continuous During Practical hour	OB
Lab Viva	-	10 %	Continuous During Practical hour	OB

NOTE:

8. **Chamber Consultation Hour**: To be announced in the on line class room.

9. **Notices**: All notices concerning this course shall be displayed on the CMS Students are advised to visit regularly **CMS** (institute's web based course management system) for updates on the course matters.

10. **Make-up Policy**: Make-up shall be given only to the genuine cases with prior intimation. No make-up will be given for the TUTORIAL tests.

11. **Academic Honesty and Integrity Policy**: Academic honesty and integrity are to be maintained by all the students throughout the semester and any type of academic dishonesty is not acceptable.

Instructor-in-charge
