5. Learning Outcome:

Topic 1: Introduction, Understanding the Indian Economy:

This module will introduce students to the course and give them a bird's eye view of the Indian economy. The students will broadly understand the current situation of Indian economy, its strength and weaknesses. The various issues facing Indian economy including poverty, inequality, structural problems among others will be discussed. The objective will be to make students interested for the course ahead and familiarize them with the Indian economy, which is a subject of interest globally.

Topic 2: National Income, GDP and Per Capita Income

In the current times, GDP and related indicators are one of the most widely used indicator to gauge development and progress of an economy. In this topic, the changing landscape of Indian economy will be understood by the students through lens of GDP. The transformation of Indian economy from time of independence when it was struggling to shrug off colonial drag to its current status of being one of the fastest growing economies, will be appreciated by understanding trends in GDP and its components.

Topic 3: Planning for the economy, plan models, Five Year Plans

From social era of five year plans to scrapping of Planning Commissions, Indian economy has evolved a lot. In these lectures, students will learn about introduction and evolution of five year plans and the role they played in growth of economy. Further, they will understand rationale of scrapping of Planning

Commission and its replacement with Niti Aayog. At the end of these lectures, the students will be able to understand historical underpinnings of plans as well as current debates against plan led development.

Topic 4: Sectoral aspects, Regional Variations, Economic Reforms

This topic will discuss the sectoral aspects of Indian economy. India being a vast geographical entity has huge variations in economic growth across regions. The students will be learn about these variations and reasons thereof. The glimpse will also be made to major economy wide reforms which have taken place so far as also the conditions which led India to undertake liberalization policies in 1990s.

Topic 5: Monetary Policy, Nationalization of Banks, Financial Sector Reforms, Role of Central Banking in India

From credit plans and controls to Monetary Policy Committee, Indian monetary policy has undergone a major change over the years. We will understand how monetary policy has contributed to India's growth narrative and also the role of the Reserve Bank in overall financial framework of the country. It would not be wrong to say the financial sector reforms have been one of the most important impetus to the Indian economy. We will understand here how the bold reforms of 90s and thereafter helped Indian economy break shackles which was holding back its growth. The nationalization of banks will also be discussed along with the current problems of NPAs in banking sector and what is being to resolve it by the policy makers.

Topic 6: External Sector, Growth and structure of India's International Trade, Balance of Payments, Import and Export Policies in India

The international trade has played an important role in growth of developing world in recent times. In this section we will read about India's external sector with an emphasis on volume, types and destinations/sources of India exports/imports. The analysis of Balance of Payment of the country will also be done. The current as well as major past policies pertaining to international trade of India will be studied in detail.

Topic 7: World Bank and India, Importance and Role of IMF in India's Growth

In today's globalized world, the important of international organization like World Bank and IMF is immense and more so, for an emerging economy like India. This topic will teach students about India's interaction with these two key global economic institutions as also the role played them in India's growth path.

Topic 8: Agricultural Policy, Agricultural Growth and Productivity, Land Reforms

In a country like India where still majority of population rely on agriculture and allied activities for their livelihood and employment, the study of agriculture attains special importance. In this section, the agriculture sector will be discussed in detail including its growth and policies. Since land forms an important input in the sector, the students will also be made familiar about the reforms that have taken place in the sector. The students will be able to assess the situation of agriculture in India and learn about the measures than can be taken to give boost to the sector.

Topic 9: Irrigation, Green Revolution, Price Policy, Subsidies and Impact of WTO

This topic further discusses important issues pertaining to agriculture. The students will get to know about green revolution and how it changed path of agriculture development in India. The peculiarity and complexity of agriculture in India has led to price flooring and subsidies. The students will be explained the mechanism and rationale of such policies as also the impact on India's standing in WTO. We will also read about irrigation which is a key input in the country where agriculture has traditionally been dependent on monsoon rains for water.

Topic 10: Industrial Policy, Controls and Licensing, Productivity and Growth

In a country like India which is emerging in economic terms and simultaneously experiencing demographic dividend, the importance of industrial sector cannot be overemphasized. In this section, the industrial profile and performance of the country will be discussed with a focus on the policies governing

the sector-both in past and present. The students will also be taught the erstwhile policies of controls and licensing, so that can appreciate the reforms that have been taking place in the sector.

Topic 11: Industrial Credit, Industrial Sickness, FDI, Industrial Reforms

It is well recognized fact that industry as a sector has been lagging. In this part of the lectures, the students will be made familiar to various issues pertaining to industrial finance and credit, as also the problems the sector is currently grappling. The policies with regard to FDI will also be discussed. The students will be made aware of the various reforms that have taken place in the sector as well as those which are underway.

Topic 12: Health and Education, Poverty and Inequality

The discussion of Indian economy is not complete without dedicated discussion on social cum economic issues of health and education. The students will be familiarized with India's journey at health and education front. The focus will also be made to understand progress in these sector in the backdrop of stellar economic performance. The students will be able to appreciate the current debates of expenditure on physical infrastructure as against social infrastructure. The issues of poverty and inequality which is plaguing the Indian at societal as well as economic level will be explained. The students will be made familiar to the progress that India has made on this front as also the work that remains to be done. The various nuances of this major problem including the change in poverty and inequality over the years, the reasons behind the same and the way ahead will be taught.

Topic 13: Concluding Lecture

This will be the concluding lecture where we will revise what we have learned in the entire course. The performance of India will be assessed in the backdrop of the various policies which were discussed in earlier sections.

6. Evaluation Scheme:

EC No.	Components	Duration	Weight age (%)	Date, Time & Venue	Nature of Component
1.	Mid-Semester Exam	90 min.	30	15/03/2019 9.00 – 10.30AM	CB
2.	Quiz-I	-	5	To be announced	CB
3.	Quiz-II	-	5	To be announced	CB
4.	Assignment-I	-	10	To be announced	OB
5.	Assignment-II	-	10	To be announced	OB
6.	Comprehensive Exam.	3 hrs.	40	10/05 FN	CB

6. Chamber Consultation Hour: To be announced in the class.
