## SECOND SEMESTER 2019-2020

### Course Handout Part II

Date: 06/01/2020

In addition to part-I (General Handout for all courses appended to the time table) this portion gives further specific details regarding the course.

Course No. : CS F415  
Course Title : Data Mining  
Instructor-in-Charge : Dr. Manik Gupta ([manik@hyderabad.bits-pilani.ac.in](mailto:manik@hyderabad.bits-pilani.ac.in))

### Scope and Objective of the Course:

The course explores the concepts and techniques of data mining, a promising and flourishing frontier in data science. Analyzing large amounts of data has become a necessity and the problem therefore arises as to “how to analyze the data”. Data Mining is the subject dealing automated extraction of useful information or patterns representing knowledge implicitly stored in large databases, data warehouses, and other massive data repositories. It is a technology that blends traditional data analysis methods with sophisticated algorithms for association rule mining, clustering, classification and outlier analysis. The course is designed to provide students with a broad understanding in the design and use of data mining algorithms. The course will provide an algorithmic as well as application perspectives of data mining.

At the end of the course the student should be able to

- Choose an appropriate data preprocessing techniques based on the given data.
- Identify and design an appropriate data mining analysis technique given a problem.
- Gain practical hands on experience in implementing data mining algorithms.

### Textbooks:

T1. Tan, Pang-Ning & others. “**Introduction to Data Mining**” Pearson Education, 2006.

### Reference Books:

- R1. Han J & Kamber M, “**Data Mining: Concepts and Techniques**,” Morgan Kaufmann Publishers, Second Edition, 2006  
R2. Christopher Bishop: “**Pattern Recognition and Machine Learning**”, Springer International Edition  
R3. Tom M. Mitchell: “**Machine Learning**”, The McGraw-Hill Companies, Inc.  
R4. Charu C. Aggarwal “**Outlier Analysis**” Springer International Publishing (2017)

## Course Plan:

Lecture No.	Learning objectives	Topics to be covered	Chapter in the Text Book
1-2	To be able to define and list applications of Data Mining	<b>Introduction to Data Mining</b> <ul style="list-style-type: none"> <li>● Motivation</li> <li>● What is Data Mining?</li> <li>● Data Mining Tasks</li> <li>● Issues in Data Mining</li> <li>● Applications</li> </ul>	T1.1
3-4	<ul style="list-style-type: none"> <li>● To be able to list preprocessing steps and identify right preprocessing step given the data</li> <li>● To be able to perform dimension reduction on huge data using PCA and feature selection approaches</li> </ul>	<b>Data Preprocessing</b> <ul style="list-style-type: none"> <li>● Types of data</li> <li>● Data Quality</li> <li>● Data preprocessing</li> <li>● Similarity and Dissimilarity</li> </ul> <b>Dimension Reduction</b> <ul style="list-style-type: none"> <li>● Principal Component Analysis</li> <li>● Greedy Algorithms for feature selection</li> </ul>	T1.2 R2.12
5-11	To be able to apply and implement association rule mining	<b>Association Rule Mining</b> <ul style="list-style-type: none"> <li>● Introduction</li> <li>● Applications</li> <li>● Market-Basket Analysis</li> <li>● Frequent Itemsets</li> <li>● Apriori Algorithm</li> <li>● Alternative Methods</li> </ul>	T1.6
12-19		<b>Advanced Association Rule Mining</b> <ul style="list-style-type: none"> <li>● Generalized Association Rules</li> <li>● Multilevel Association Rules</li> <li>● Multidimensional Association Rules</li> <li>● Graph Mining</li> <li>● Sequence Mining</li> <li>● Constrained Based Association Rules</li> </ul>	T1.7
20-28	To be able to apply and implement unsupervised learning algorithms	<b>Clustering</b> <ul style="list-style-type: none"> <li>● Introduction</li> <li>● Applications</li> <li>● Partitioning Algorithms</li> </ul>	T1.8 T1.9 R2.12 R3.6

		<ul style="list-style-type: none"> <li>● Hierarchical Algorithms</li> <li>● Density based Algorithms</li> <li>● Cluster Evaluation</li> <li>● Graph-Based Clustering</li> </ul>	
29-36	To be able to apply and implement anomaly detection algorithms	<b>Outlier Analysis</b> <ul style="list-style-type: none"> <li>● What are Outliers</li> <li>● Distance-Based Outlier Analysis</li> <li>● Density-Based Outliers</li> <li>● Limitations of Proximity-Based Detection</li> </ul>	T1.10 R4.4
37-42	To be able to apply and implement classification models	<b>Classification Techniques</b> <ul style="list-style-type: none"> <li>● Basic Classification Techniques</li> <li>● Decision Tree</li> <li>● Naïve Bayes</li> </ul>	T1.5 R2.9

### Evaluation Scheme:

Component	Duration	Weightage (%)	Date & Time	Nature of Component
Mid Term Exam	1.5 hours.	25	6/3 9.00 - 10.30AM	Closed Book
Research Project	--	30	TBA	Take home
In class assignments	--	10	Unannounced	In class
Comprehensive Exam	3 Hours	35	12/05 FN	Closed Book

### Chamber Consultation Hour:

TBA

### Notices:

All notices and announcements pertaining to this course will be displayed on the CMS.

### Make-up Policy:

1. No Make-up requests for research submissions and in class assignments will be catered to.
2. Prior permission of the Instructor-in-Charge is required to get make-up for the mid-semester exam. Only on producing documentary proof of absence, proving that student would be physically unable to appear for the exam the decision of granting the make-up will be taken. The recommendation from chief warden is necessary to request for a make-up.
3. Prior permission of Dean, AUGSD is required to get make-up for the comprehensive exam.
4. Instructor-in-charge's/Dean's decision in the matter of granting make-up would be final.

### Academic Honesty and Integrity Policy:

Academic honesty and integrity are to be maintained by all the students throughout the semester and no type of academic dishonesty is acceptable.
