1. Course Description: This course is based on laboratory experiments in different fields of chemistry. The course is available for first year students.

2. Scope and Objective: The main objective of this course is to educate the students with different aspects of chemistry experiments. The students will carry out a set of experiments that will expose them to various experimental techniques in Organic, Inorganic and Physical chemistry. They will learn operating different scientific equipments for collecting data. Experiments in organic and inorganic chemistry will include synthesis and analysis of different compounds. Experiments in physical chemistry will include pH metry, conductometry, spectrophotometry and chemical kinetics experiments.

3. Text Book(s): Chemistry Laboratory Manual

4. Reference Book: Reference sources for each experiment will be specified as necessary.

5. Course Plan: The students will perform selected experiments in organic, inorganic & physical chemistry.
