SECOND SEMESTER 2022-2023
COURSE HANDOUT

Date: 16.01.2023

Course No.	:	PHY F342
Course Title	:	Atomic and Molecular Physics
Instructor-in-charge :	:	ARANYA B BHATTACHERJEE
Instructor	:	Aranya B Bhattacharjee

1. Course Description: Main topics to be covered in the course include: Interaction of Atoms with Electromagnetic Radiation, Fine and Hyperfine Structure of Atomic Energy Levels, Quantum-mechanical Description of Atoms with Several Electrons, Molecular Structure and Molecular Spectra.

2. Scope and objective: Atomic and Molecular Physics could be conceived as applications of Quantum Mechanics, Electromagnetism, and Statistical Physics to the physical phenomena occurring at atomic and molecular scales. The course mainly deals with the quantum mechanical description of atoms with one and several electrons as well as how do atoms and molecules interact with light.

The course will enable students to solve simple problems based on the laws of atomic or molecular physics exploiting the laws and techniques of Quantum Mechanics, Electromagnetism, and Statistical Physics.

3. Text Book: B. H. Bransden and C. J. Joachain, *Physics of Atoms and Molecules*, Pearson, 2nd ed. 2001.
