

Second Semester 2023-24

Course Handout Part II

Date:

06/01/2024

In addition to part -I (general handout for all courses appended to the time table) this portion gives further specific details regarding the course.

Course Number CHEM F110

Course Title CHEMISTRY LABORATORY

Instructor-in-Charge Nilanjan Dey
e

Team of Instructors Dr. Sourav Bag, Dr. Chanchal Chakraborty, Prof. K. Sumithra, Prof. Sounak Roy, Prof. Tanmay Chatterjee, Prof. R Krishnan, Prof. KVG Chandrasekhar, Dr. Ramakrishnan G, Prof. J. Subbalakshmi, Prof. Durba Roy

1. Course Description: This course is based on laboratory experiments in different fields of chemistry. The course is conducted for first year students.

2. Scope and Objective: The main objective of this course is to educate the students with different aspects of experiments in chemistry. The students will carry out a set of experiments that will expose them to various experimental techniques like preparation of standard solution, chemical synthesis, filtrations, recrystallization, and operating of different scientific equipment for collecting data and analysis. Experiments in Organic and Inorganic chemistry will include synthesis and analysis of different compounds. Experiments in Physical chemistry will include pH metry, conductometry, spectrophotometry and chemical kinetics experiments.

3. Text Book(s): Chemistry Laboratory Manual

4. Reference Book: Reference sources for each experiment will be specified as necessary.

5. Course Plan: Students will perform selected experiments in Organic, Inorganic & Physical chemistry

List of Experiments:

1st Cycle

Lab 1	Synthesis and recrystallization of dibenzalacetone
Lab 2	Determination of the concentration equilibrium constant (K_c) of the reaction
Lab 3	Dissociation constant of a weak electrolyte by conductometry
Lab 4	Preparation of potassium bis(oxalate) Cu(II) complex and Preparation of iron acetyl acetonate complex
Lab 5	Synthesis of glucosazone

2nd Cycle

Lab 6	Determination of the activation energy of hydrogen peroxide - potassium iodide clock reaction
Lab 7	Determination of pH curve of an acid-base titration
Lab 8	Estimation of copper by Iodometry
Lab 9	Determination of the unknown strengths of a strong and a weak acid solution by conductometric titration

6. Evaluation:

Component	Duration	Weightage (%)	Date & Time	Type
Lab performance and Calculation, and data interpretation * 60 Continuous**				Open-Book,
Midsem Quiz	60 min	20	09/03 - 3.30 - 5.00PM	Closed book
Lab exam	90 min	20	04/05 FN	Practical examination

***Attendance and Punctuality, Laboratory Conduct, and Record maintenance = 15 M** will be important in the evaluation.

** All 9 (nine) experiments will be evaluated in the lab, and the best eight will be considered.

7. Make-up policy: There will be no makeup granted.

8. Notice: All notices concerning the course will be displayed on Chemistry Department Notice Board and/or CMS. **Lab manual, White Lab Coat with proper shoes covering the entire feet are compulsory.**

9. Academic Honesty and Integrity Policy: Academic honesty and integrity are to be maintained by all the students throughout the semester and no type of academic dishonesty is acceptable.

10. Final grading will be done based on the overall performance of a student in each of the components as listed in item no. 6.
