# BITS-Pilani, Hyderabad Campus First Semester 2021-2022 Course Handout

Date:

#### 06/08/2021

In addition to Part I (General Handout for all courses appended to the Timetable) this portion gives further specific details regarding the course.

Course Number : EEE G612 3 2 5

Course Title : Coding Theory & Practice Course Coordinator : Prof. RUNA KUMARI.

### 1. Course Description

Codes for data-compression: instantaneous codes; Kraft inequality; Mcmillan theorem; Huffman codes; codes for error-detection and correction; binary symmetric channel; channel capacity, Shannon's fundamental theorem; linear codes; Macwilliam's identity; Reed-muller codes; cyclic codes; BCH codes; codes for secrecy and security; private-key cryptosystems; affine codes; twisted codes; one-time-pads; public-key cryptosystems based on large primes and discrete logarithms.

## 2. Scope and Objective of the Course:

The course covers source coding, channel coding & encryption. The former deals with error correction in noisy channel, and the latter deals with secrecy of communication. Channel coding, which constitutes the major portion of the course, will introduce a number of important classes of error-detecting and error-correcting codes and their decoding. Finally the course will give an introduction to encryption & decryption of data for secret communications.

#### 3. Text Books:

Information theory, Coding and Cryptography, Ranjan Bose, Tata McGraw Hill, 3rd ed, 2017.

#### 4. Reference Books:

- 1. Element of Information Theory, Thomas M Cover, John Wiley & Sons, 2004
- 2. Information Theory and Coding, Normal Abrahamson, Mcgraw Hill, Electronic Sciences Series.
- 3. Principles of Digital Communication by Robert Gallager, Cambridge University Press.
- 4. Introduction to Data Compression by Khalid Sayood, Morgan Kaufmann, Elsevier.

5. Error Control Coding-Fundamentals and Applications, Shu Lin and Daniel Costello, Prentice Hall

# 5. Course Plan / Schedule:

| SI<br># | Learning objectives  | Topics to be covered  | Chapte<br>r No.              | No.<br>of<br>lectu<br>res |
|---------|--|---|------------------------------|---------------------------|
| 1.      | Introduction   | Introduction to the course & Coding                                   |                              | 1                         |
| 2.      | To introduce the concept of<br>Uncertainty, Entropy                | Data compression, Entropy   | TB:Ch.<br>1<br>Ref:Ch.<br>2  | 3                         |
| 3.      | To introduce the concepts of coding and decoding                   | Unique and instantaneous codes, Kraft's inequality                    | TB:Ch.<br>1<br>Ref:Ch.<br>5  | 3                         |
| 4.      | To introduce Universal<br>Source coding                            | Huffman, Shannon-Fano-Elias,<br>Arithmetic, L-z, Run Length<br>Coding | TB:Ch.1                      | 4                         |
| 5.      | To introduce optimal codes   | Rate distortion theorem, Optimal code length                          | TB:Ch.<br>1<br>Ref:Ch.<br>13 | 2                         |
| 6.      | To introduce the concept of channel capacity and coding            | Channel models, channel capacity, Shannon limit                       | TB:Ch.                       | 2                         |
| 7.      | To introduce the concept of error correcting codes                 | Linear block codes, generator<br>& parity check matrix                | TB:Ch.                       | 4                         |
| 8.      | To introduce the concept of syndrome and decoding through syndrome | Syndrome decoding of linear codes                                     | TB:Ch.                       | 2                         |
| 9.      | To study cyclic codes, their encoding & decoding                   | Cyclic codes  | TB:Ch.                       | 3                         |
| 1<br>0. | To study certain well known linear codes                           | Well-known block codes ;<br>Golay code, CRC codes                     | TB:Ch.                       | 3                         |
| 1<br>1. | To introduce the important class of BCH codes                      | BCH codes, Reed-Solomon codes   | TB:Ch.5                      | 3                         |
| 1 2     | To introduce the important class of Convolutional coder & decoder  | Convolutional codes, Viterbi<br>decoding, turbo codes                 | TB:Ch.                       | 6                         |

| 1  | To introduce the concept of | Models, goals and early      | TB:Ch.9 | 2  |
|----|-----------------------------|------------------------------|---------|----|
| 3. | data encryption and         | cipher systems               |         |    |
|    | decryption                  |                              |         |    |
| 1  | To introduce Public Key     | Public Key Crypto systems    | TB:Ch.  | 2  |
| 4  | Cryptosystems               | and some examples            | 9       |    |
|    |                             | Total no. of classes planned |         | 40 |

## 6. Evaluation Scheme:

| Component               | Duratio<br>n | Weightage | Mark<br>s | Date & Time  | Remarks                 |
|-------------------------|--------------|-----------|-----------|--|-------------------------|
| Mid Sem                 | 90 mts.      | 25%       | 75        | Announced by Time table  | Open<br>Book            |
| Surprise<br>quizzes     |              | 5%        | 15        | -  | Closed<br>Book          |
| Laboratory<br>Component |              | 15%       | 45        | 2 Hr Lab Session per<br>week + 2Hr End<br>semester Practical<br>Exam | Open<br>Book            |
| Term Project            |              | 15%       | 45        | Weekly interaction +<br>End semester Project<br>presentation         | Open<br>Book            |
| Comprehensi<br>ve       | 2 Hrs        | 40%       | 120       | Announced by Time<br>table   | Open/<br>Closed<br>Book |
| Totals                  |              | 100%      | 300       |  |                         |

- 7. Chamber Consultation Hour: To be announced in Class
- **8. Make-up Policy:** Make-up will be given on extremely genuine grounds only. Prior application should be made for seeking the make-up examination.
- **9. Notices:** Notices, if any, concerning the course will be put up on CMS only
