In addition to part-I (General Handout for all courses appended to the timetable), this portion gives further specific details regarding the course.

Course No.   : **MATH F242**
Course Title   : **OPERATIONS RESERACH**
Instructor-in-charge   : **PTV Praveen Kumar**
Instructor   : DK SATPATHI

1. **Scopes and Objective of the Course:**

This course begins with applications overview of Operations Research, and introduces dynamic programming and network models. After a review of probability distributions, inventory models and queuing systems will be covered. Decision- making under certainty, risk, and uncertainty; along with an introduction to game theory will be dealt. Finally simulation techniques, introduction for estimating solutions to problems, that are not amenable to conventional solution techniques, will be made. Students will also be taught the basic concepts on system reliability.
