Date: 17/08/2020

In addition to Part I (General Handout for all courses appended to the time table) this portion gives further specific details regarding the course.

Course No.   :   **PHA F415**
Course Title   :   **Pathophysiology**
Instructor In-charge   :   **Onkar Kulkarni**

1) Scope & Objective of the Course:

This course is intended to give the students an insight into the physiological changes associated with the disease conditions and tissue injuries. It intends to make students understand the molecular mechanisms, molecular pathways and cellular pathophysiology associated with disease pathology. This course will provide brief overview of cellular mechanisms, molecular pathways, and clinical symptoms associated with various human pathological conditions like, autoimmunity, degenerative diseases, inflammatory diseases, metabolic diseases, infectious diseases and cancer.

Learning Outcomes (course benefits): Students who have undergone the course are expected to

•   Explain the mechanism of cellular injury associated with a particular human disease
•   Understand the rationale behind the clinical symptoms associated with human diseases
•   Understand the molecular mechanisms of drugs used for the treatment of various diseases
•   Explain the molecular pathways associated with development of human diseases

2) Text book:

1) The Robbins Pathologic Basis of Disease by S.L Robbins, R.S.Cotran and Vinay Kumar. Saunders Company, Philadelphia: 6th edition 1991.

Reference Books:

1) Color Atlas of Pathophysiology by Florian Lang, Stephen Silbernagl, Theieme Medical Pub: (May 2000).
2) Essentials of Pathophysiology: Concepts of Altered Health States. Porth, Carol. Philadelphia :Lippincott Williams & Wilkins, 4th edition

3) **Course Plan:**

Lect. No.	Learning Objectives	Topics to be covered	Chap/Sec No. (Book)
1-5	Understand the Fundamentals and mechanisms of cellular injury	Cell adaptation, Cell injury and Cell death	T1-Ch1, R1-Ch1, R2-Ch2
6-10	Understand the molecular mechanisms and pathways involved in acute and chronic inflammation	Mediators of inflammation, cellular responses, role of various cells in inflammation , pathogenesis of gout	T1-Ch2, R1-Ch3, R2-Ch3
11-17	Understand the molecular pathways and mechanism involved with development of autoimmunity	Mechanisms of autoimmunity and Rheumatoid arthritis, Multiple sclerosis	T1-Ch4, R1-Ch3, R2-Ch16,44
18-21	Understand the molecular pathways and mechanism involved with respiratory Disorders	Pathophysiology of Asthma, COPD	T1-Ch12, R1-Ch4, R2-Ch23
22-24	Understand the molecular pathways and mechanism involved with gastrointestinal disease	Gastric ulcer, Inflammatory bowel disease	T1-Ch14, R1-Ch6, R2-Ch29
25-29	Understand the molecular pathways and mechanism associated with diabetes and obesity	Pathophysiology and consequences of diabetes and hyperlipidemia	T1-Ch19, R1-Ch8,9, R2-Ch33
30-32	Understand the molecular pathways and mechanism involved with the development of cardiovascular Disorders	Pathophysiology of hypertension and atherosclerosis	T1-Ch9,10, R1-Ch7, R2-Ch19

33-36	Understand the molecular pathways and mechanism involved with nervous system disorders and associated diseases	Parkinson's disease, Myasthenia Gravis, and Alzheimer's disease,			T1-Ch22, R1-Ch10, R2-Unit 10
37-41	Understand the molecular pathways and mechanism involved with the development of cancer	The molecular and biochemical basis of cancer, Pathophysiology of Neoplasia			T1-Ch5, R1-Ch1, R2-Ch7
42-43	Understand the molecular pathways and mechanism involved with the development of AIDS	Pathophysiology of AIDS			R2-Ch14

4) **Evaluation Scheme:**

Component	Duration	Weightage	Date	Time	Nature
Test I	30 mins	15 %	September 10 –September 20 (During scheduled class hour) – Exact date will be announced in the class		OB
Test II	30 mins	15 %	October 09 –October 20 (During scheduled class hour) – Exact date will be announced in the class		OB
Test III	30 mins	10 %	November 10 – November 20 (During scheduled class hour) – Exact date will be announced in the class		OB
Surprise quiz (3)	20 mins	15%	Three surprise quizzes will be conducted (five marks each)		
Assignment		10%			
Compre. Exam.	120 min	35 %	As announced in the Timetable		OB

(40 % weightage before T2)

5) Mid-Semester Grading: Mid-semester grading will be announced just after Test 2 in the third/fourth week of October on the basis of marks secured in Test 1, Test 2 and other evaluation components (completed by third week of October) (40 % weightage before T2).

6) Make-up: Prior approval or intimation to take a make-up is mandatory. It is solely at the discretion of the instructor-in-charge, depending upon the genuineness of the circumstances, to allow or disallow a student to appear for a make-up evaluation component. No makeup will be granted for Assignments/Quizzes under any circumstances.

7) Grading Procedure:
- Grading will be done by "bunching" procedure. Total marks obtained by the students will be arranged in descending order, 'bunches' will be identified and grades awarded accordingly. Fine grading system (A, A-, B, B-....) will be followed.
- It is not mandatory for the instructor-in-charge to award all the grades (A to E); subjective judgment will be used for awarding the grades.
- As specified in Handout – Part I, appended to the timetable, the instructor in-charge reserves the right to award a NC report in case the student does not make himself/ herself available for any of the evaluation component mentioned above.
- Borderline cases during grading will be judged on the basis of regularity to classes and consistency or progress in the performance in evaluation components.

8) Chamber Consultation Hours: To be announced in class.

9) Notices: All the notices pertaining to this course will be displayed only on CMS

10) Academic Honesty and Integrity Policy: Academic honesty and integrity are to be maintained by all the students throughout the semester and no type of academic dishonesty is acceptable.
