Course No. : EEE F111
Course Title : ELECTRICAL SCIENCES
Instructor-in-charge : Sudha Radhika
Instructors: Lectures: Sudha Radhika, Parikshit Sahatiya
Instructors: Tutorials: Sudha Radhika, Parikshit Sahatiya, Sourav Nandi, Sandeep Kumar

1. **Course Description:**

   Course covers basic passive and active circuit elements; network theorems and analysis; introduction to single and three phase systems; magnetic circuits; transformers; electrical machines; semi-conductor diodes and applications; transistors and applications; Digital electronics and commonly used measuring instruments.

2. **Scope and objective of the Course**:

   A basic understanding of the working of electrical and electronic circuits and instruments is essential for all engineers and scientists. This course is designed to give the students of all branches a preliminary exposure to this field. The need for basic understanding in this field will come for non-electrical or electronic students at a later stage in their career growth. For EEE, ECE and E&I students this course acts as a good starting point for their CDCs.
   To obtain basic knowledge on:
      a. Electrical and Magnetic Circuits.
      b. Electrical machines.
      c. Semiconductor Diodes and BJTs ; Digital electronics.

3. **Text Book**: Leonard S. Bobrow: Fundamentals of Electrical Engineering, Oxford University Press, Second Edition, 2005.
